BIDDER'S QUERY

<u>Bidder's Query</u>	<u>GSIS Response</u>
<p>Request to allow the bidder to submit a Certified Symantec Engineer from its partner distributor, instead of the bidder being certified by Symantec to do migration of the Symantec Solution. Since the bidder is not yet certified by Symantec to do migration for their products, the bidder is planning to tap the services of the distributor who is certified by Symantec to do such migration.</p>	<p>Submitting Certified Symantec Engineer will not be sufficient for the migration of existing Symantec Solution to new VM environment. Existing Symantec solutions is part of GSIS critical infrastructure and it is not a plug-and-play-product and the migration will require reconfiguration services. The activity is also not simply migration from VM to VM but from traditional server setup to VMware. To protect GSIS from any untoward potential technical concerns in the migration to VM environment, the prospective bidder shall secure certification from Symantec that they are authorized to perform the migration services.</p>

For the guidance and information of all concerned.
